Mgs Estates (UK) Ltd

Another Working Partnership

We are proud to say we have a strong relationship with a number of agencies/companies and have just created another by providing and renting a 2 bedroom house to someone supported by the

Sefton veterans.

The sefton veterans approached us with a proposal for one of our newest houses in Bootle, which was a building site at the time. They explained, they had a gentleman called Terry who needed his own property, was looking for the bootle area and had recently come out of their supported services. We worked to a tight deadline and are proud to say that it has been a success and the gentleman is now very happy with his new home.

We are also very happy to say, we have another house lined up for another gentleman in the same circumstances from the sefton veterans service. We hope to work in partnership with this company for the foreseeable future.
